Join OJAFR Team

Online Journal of Animal and Feed Research is always striving to add diversity to our editorial board and staff. Applicants who have previous experience relevant to the position they are applying for may be considered for more senior positions within OJAFR. All applicants should begin as section reviewers before progressing on to more senior roles. Editorial board members do not receive any remuneration unless in overtime working conditions. These positions are voluntary. If you are currently graduated from MSc, or PhD at university and interested in working for OJAFR, please fill out the application form below. Once your filled application form is submitted, the editorial board of the journal will review your request and inform you within a week of their decision for membership in the editorial board. The list of the editorial board will be updated yearly and the new members will be listed each year. If you are a PhD, assistant, associate professor, distinguished professor, or an active researcher, please send us a copy of your resume (CV) and your [ORCID ID](#). You should briefly express any leadership positions, editorial or publishing activities, and other experiences you have had that are relevant to applied research, conducted studies, and published articles. Also, the volunteer editor/reviewer should declare if he/she has any conflict of interest for joining the journal editorial board in requesting time, and also during his/her activity as an editor or reviewer.

If you would like to represent the OJAFR at your university, join our volunteer staff today! OJAFR representatives can include any assistant students, teachers, instructors, researchers, and professors at university or international institutes. You can also, register as a member of the journal for subsequent contacts by email and or invitation for joining to educational webinars.

Editors affiliated with the *Online Journal of Animal and Feed Research* who are also serving on the editorial boards of other journals sharing similar goals and scope are expected to adhere to the policies of the *Online Journal of Animal and Feed Research* while they are involved in editorial responsibilities at the *Online Journal of Animal and Feed Research*. For such editors, it is important to declare any potential conflict of interest transparently. If at any stage of the journal's peer review process, it becomes apparent that a submitted article is under consideration in a journal where our editor also serves, the *Online Journal of Animal and Feed Research* immediately reassigns the article to another editor. Similarly, if such a situation involves the editor-in-chief, and the editor-in-chief collaborates with another journal, the responsibility for handling that article is delegated to the second editor-in-chief/associate editor-in-chief/handling editor/managing editor. In case of a conflict of interest between the editor-in-chief and any of the mentioned roles, the article will be handled by one of the editorial board members.
